

Introduction to ATLAS.ti Mac

Free webinar (web-conference)

Language: English

Duration: 10:00-11:00 (CET)

*Instructor: Ivana Radivojevic, Project Coordinator and Client Relations Manager with ATLAS.ti
(Ivana.radivojevic@atlasti.com)*

Requirements

This webinar is taught using GoToWebinar, an online video conferencing system. To participate in the webinar, a high-speed Internet connection is necessary, as well as a microphone and speakers connected to the computer. A wireless Internet connection is not recommended. It is advised to have ATLAS.ti installed on the user's computer (full or trial version). You can install the free trial version here: <http://atlasti.com/free-trial-version/>

Introduction

The objective of this webinar is to provide a global overview of ATLAS.ti Mac, including the fundamental procedures related to creating a project, segmenting the data, coding, analysis, and obtaining results.

Outline

1. **Creating the project**
 - a. Creating the project
 - b. Importing documents: text, images, videos, audio files, and maps
 - c. Working with survey data
 - d. Organising documents in groups
2. **Data segmentation and coding**
 - a. Segmenting the data and creating quotations
 - b. Coding: in vivo, open coding, coding by list, and auto-coding
3. **Memo writing**
 - a. Reflecting on the analysis process
 - b. Creating memos
 - c. Associating memos to quotations
4. **Analysis**
 - a. Visualising links in a network and creating semantic networks
 - b. Word cruncher
 - c. Code-document table
 - d. Code co-occurrence table
5. **Questions and answers**
